

## Allocation of Care

Per Dr. Elizabeth Lee Vliet, president and CEO of Truth for Health Foundation (published in Wisconsin Christian News, Volume 22 Number 7):

The COVID Protocol hospital physicians must follow, in lockstep across the U.S., appears to be the implementation of the 2009-2010 “Complete Lives System” developed by Dr. Ezekiel Emanuel for rationing medical care for people older than 50.

Dr. Emanuel, who was the senior White House health policy adviser to President Obama and has been advising President Joe Biden about COVID-19, stated in his classic 2009 Lancet paper: “When implemented, the Complete Lives System produces a priority curve on which individuals aged between roughly 15 and 40 years get the most substantial chance, whereas the youngest and oldest people get chances that are attenuated.”

“Attenuated” means rationed, restricted, or denied medical care that commonly leads to premature death.

In 2021, whistleblower doctors, nurses, attorneys, patient advocates and journalists have exposed egregious hospital abuses, neglect of patients, and denial of vital intravenous fluids and basic medicines to hospitalized COVID patients across the U.S.
