

# So What?

## What Can We Do?

**Become Educated:** There are many organizations designed to help educate the population. Truth for Health and Citizens' Council for Health Freedom are two organizations committed to the truth.

**Repent of Relying on Man vs. God:** Man has never been able to solve man's problems. The United States is getting what it has been asking for. 2 Chronicles 7:14 says, "If My people who are called by My name will humble themselves, and pray and seek My face, and turn from their wicked ways, then I will hear from heaven, and will forgive their sin and heal their land."

### **Pray:**

For Christians in the battle to realize it is not their battle, but they are being used for His battle (Acts 26:17-18).

For Christians to not be afraid – keep on speaking; do not be silent (Acts 18:9).

For unbelieving doctors and nurses to have their hearts opened to the fact that all lives matter.

For believing doctors and nurses to stand on the truth, without the fear of losing their jobs. God will care for them much more than the birds of the air (Matthew 6:26).

For the blindness to be removed from people believing in man's ways as the solution to their problems (Proverbs 14:12).

For a heart of forgiveness for those who have been hurt by the actions of medical providers (Matthew 18:21-35).

For God's hedge of protection around those standing on His truth as they walk through the many obstacles they face.

For believers to walk in His light as we face challenges – be kind to those who oppose us (2 Timothy 2:24 – 26).
